

Den Skandinaviske Bryggerhøjskole The Scandinavian School of Brewing

Executive in Beverage Industry Supply Chains

Who will benefit from this course:

This course is taught at "Diploma Master Brewer" level, but for non – brewers, and in a small, exclusive team. The typical candidate will be in a senior Supply Chain Management position responsible for all or part of the Supply Chain in the business. He or she will have an engineering, financial or commercial education at advanced level and a command in English language to understand and read technical English and an ambition to learn brewing, beer processing, packaging and utilities.

The real benefit of this course is, that the candidate after the course will be able better to challenge his/her Master Brewers when discussing CAPEX, NPD, QA and production issues.

The education, contents and demands:

First week: SSB in Copenhagen.

Raw materials malt, adjuncts (barley), hops and water. The malting process, the complete brewhouse process, modern yeast performance, the fermentation and stabilisation process through various filtration systems to various packaging systems. Furthermore, basic brewery calculations for making beer and for dimensioning a brewery are taught and trained from theory through to dedicated Software calculation tools.

Visits: Planned visits to a malting plant and two breweries.

Second week: SSB and visits to breweries and suppliers in Denmark.

Modern Plant maintenance concepts, metering systems for KPIs and utilities management is taught. Challenges using modern Packaging materials. Production is part of the Value Chain in the brewery with warehousing, transport, distribution and planning being the other components. Logistic concepts for order-picking, Hi – Bay Warehouses, transport, cross – docking and distribution are shown.

Demands: The participants are expected to perform team exercises in Class and plant environment, work into evenings and to identify problems and propose solutions.

Course plan for 2 modules:

Module 1: 21 – 25 June 2010

One week in Copenhagen, visits to nearby breweries and a malting plant.

Module 2: 22 – 26 November 2010

One week in Denmark, visits to a brewery, a PET pre - form plant and a can maker.

Course fee:

The fee is DKK 45.000 incl. teaching, meals, course material and all visits during the modules. The price is based upon 8 participants. More participants = lower price.

Information and Registration:

Before Thursday 20 MAY 2010 to Axel G. Kristiansen: agk@brewingschool.dk
